

# INTRODUCING THE **GF-7** STANDARD

To meet evolving standards for fuel efficiency and emissions, OEMs continue to adopt advanced engine technologies like turbocharged direct injection and stop-start systems. These engines place greater demands on motor oil performance. That's why Kendall® collaborated with OEMs and additive suppliers to help shape the new ILSAC GF-7 and API SQ standards. Our new GF-7 formulations go beyond previous benchmarks—delivering enhanced wear protection, cleaner engine performance, improved fuel economy, reduced carbon emissions, and greater defense against low-speed pre-ignition.

## Comparison of **GF-7, GF-6/SN PLUS** and **GF-5/SN Plus**

With the introduction of GF-7 comes new designations and refreshed certification symbols. Oils meeting the ILSAC GF-7A and API SQ standards—such as 0W-20, 5W-20, 5W-30, and 10W-30—will feature the familiar starburst icon. The 0W-16 grade, meeting GF-7B and API SQ requirements, will display the shield symbol introduced with GF-6B. Heavier grades like 10W-40 and 20W-50 meet API SQ requirements but do not qualify for ILSAC certification and will not carry a starburst or shield.

### GF-7A

0W-20  
5W-20  
5W-30  
10W-30

### GF-7B

0W-16
