

GF-7 is the result of close collaboration with API, OEMs, and additive partners. Engineered and rigorously tested for both modern and legacy engines, it represents our most advanced motor oil formulation to date.

The new GF-7 standard brings updated designations and refreshed certification symbols. Oils meeting the ILSAC GF-7A and API SQ standards—such as 0W-20, 5W-20, 5W-30, and 10W-30—will feature the traditional starburst symbol. The 0W-16 grade, meeting GF-7B and API SQ requirements, will display the shield symbol introduced with GF-6B. Heavier viscosity grades like 10W-40 and 20W-50 will continue to meet the API SQ standard but will not carry an ILSAC certification mark.

GF-7A		GF-7B	
	0W-20 5W-20 5W-30 10W-30		0W-16
